Objectives

Recent graduate with a BSc in Computer Information Systems and a three-months internship experience. Seeking a Junior Web Developer position where I can apply my experience in Web Development with skills in HTML5, CSS, MySQL, ORM and JavaScript(ES6+). Additionally, a comprehensive knowledge of JavaScript frameworks (React.js, Vue.js, Node.js, Express.js) and experience in building scalable web applications. A dedicated worker aiming to help achieve company goals and take on more responsibility as quickly as possible.

Education

Bachelor of Computer Information Systems Jordan University of Science and Technology | Irbid, Jordan, July 2024

GPA: Very Good

Graduation project: Exam Generator for Educational sector

Work Experience

Intern at RhinoSoft Company Amman -Jordan, March 2024-June 2024

- Gained comprehensive understanding of web development processes.
- Learned how to design and develop RESTful APIs using Express.js.
- Mastered front-end development fundamentals: HTML, CSS and JavaScript.
- Trained in Vue.js, enhancing skills in a modern JavaScript framework.

Intern at The Hope International Company Remote, July 2023-Sep 2023

- learned user experience design fundamentals and user interface design essentials.
- Gained hands-on experience in creating designs for web and mobile projects using Figma.
- Developed interactive prototype using Figma.

Extracurricular Activities

Support Team Member, International Relationship Office, 2023-2024

- Collaborated with the team to organize and set up the IRO Events.
- Hosted delegation from Latvia at my university.

Courses and Certificates

- React-The Complete Guide, Udemy 2024
- Interactive Online Coaching Program - 12 Hours

Project:

Exam Generator, 2024

Project description:

- Implemented user-friendly interfaces and functionalities using Vue.js.
- Collaborated with backend developers to integrate APIs and manage data flow.
- Ensure seamless user experience by coordinating frontend and backend systems.

Events website, 2024

Project description:

- Developed an event management website with features for user login, signup, event creation, and event discovery.
- Integrated Redux for managing global state and handling API requests efficiently across the application.
- Utilized React Router DOM for seamless routing and navigation between different pages.
- Strengthened skills in React routing, state management, and real-world application architecture.

Store Application, 2024

Project description:

- Developed a dynamic store application using React for product display and order placement.
- Implemented API fetching to retrieve and display products and manage order processing.
- Utilized Context API to manage global state.
- Applied useEffect hook for handling side effects, such as data fetching and managing component lifecycle events.

Project Management Application, 2024

Project description:

- Implemented a client-side web application using React.js.
- In order to address the issue of prop drilling , I implemented a state management solution using the Context API.

Skills

Technical skills:

- Programming Languages : C++, Python, PHP, SQL, JavaScript(ES6+), HTML5/CSS.
- Frameworks : React.js(Redux , ToolKit), Vue.js, Express.js, Tailwind .
- Developer Tools : Git , GitHub, VS code, PyCharm, MySQL, phpMyAdmin.
- Concepts and Paradigms : RESTful APIs, Object-Oriented programming (OOP), Data Structures.
- Design Tools :Figma

Soft skills:

- Business communication   Collaboration
- Problem Solving   Teamwork
- Active Listening   Leadership
- Critical Thinking   Attention to Detail
- Motivation   Conflict Resolution
